

ASPHALT PRIMER

**MAXIMUM ADHESION WHEN
BINDING OLD AND NEW ASPHALT**

EASY TO USE

Asphalt Primer is an emulsified asphalt containing selected filler designed for use as a track coat for cold and hot mix patching. It is cold applied.

DIRECTIONS

Sweep surface and remove any loose material. Surface should be clean and dry. Brush asphalt primer on top repaired surface directly from container.

DO NOT SEAL COAT WITH THIS PRODUCT!

Keep From Freezing and seal container when not in use.

APPLICATION

Stir thoroughly before using. Apply PRIMER by means of a broom or spray to repair areas. Make sure edges of repair are primed. Let the PRIMER become tacky before applying cold mix or hot mix. Minimum application temperature is 10°C (50°F).

PRIMER may be thinned with a small amount of clean water if a thinner consistency is required. Do not use if there is a possibility of rain.

CLEAN-UP

Use water to clean up fresh material. Dried material may be cleaned up with mineral spirits

CONTAINS

Petroleum Asphalt Base CAS8052-42-4 and Proprietary Alkaline Soap. Material can be irritating to eyes. Prolonged or repeated contact may cause skin irritation, including possible allergic dermatitis. Swallowing this material can cause stomach irritation, nausea and vomiting-

DO NOT TAKE INTERNALLY. Inhalation of vapors may cause headache, nausea, feeling of dizziness or weakness, and shortness of breath. Use with adequate ventilation.

PLEASE REFER TO THE MSDS FOR MORE DETAILED PRECAUTIONARY MEASURES, HANDLING INSTRUCTIONS AND EMERGENCY PROCEDURES

FIRST AID

Eyes: Flush with large amounts of water for at least 15 minutes lifting lids to ensure complete irrigation. Seek medical attention.

SKIN

Immediately remove contaminated clothing and wash affected area with soap and water. Do not use solvents or thinners to remove material from skin. If irritation or redness persists or develops after exposure, contact a physician.

INGESTION

DO NOT INDUCE VOMITING! Vomiting can cause the material to be aspirated into the lungs causing chemical pneumonitis, which can be fatal. Keep victim warm and quiet. Get immediate medical attention.
